

SECTION 1: ECONOMICS (Question 1 to 16)

Environment Management (HS 200)

1. What is the greenhouse effect?
 - a) When the gases from burning fossil fuels increase, trap heat inside the earth's atmosphere and cause global temperature to increase
 - b) When the gases from burning fossil fuels increase, trap heat inside the earth's atmosphere and cause global temperatures to decrease
 - c) When the gases from burning fossil fuels decrease, trap heat inside the earth's atmosphere and cause global temperatures to increase
 - d) All of the above
2. Identify which of the following is 'a social cost'
 - a. Thermal power stations in Delhi creating acid rain that causes deforestation in Uttar Pradesh
 - b. The new metro line in Mumbai reduced the number of cars on the road
 - c. Power stations in India installing carbon capture technology
 - d. Fish catch limit in Lake Chilika
3. Which of the following would be an example of nonrivalness and non-excludability?
 - a. Amusement Park
 - b. Electronic journals subscribed by library
 - c. An emergency warning siren located on top of the tallest building on your campus
 - d. Garbage collection service provided by IIT on a monthly fee basis
4. Liability laws may help achieve efficient level of emissions when
 - a. it is easy to establish a polluting source as the cause of damage.
 - b. it is easy to estimate the monetary amount of damage.
 - c. cost of litigation is likely to be small.
 - d. all of the above are true.
5. Which of the following has maximum global warming potential?
 - a. Chlorofluorocarbons (CFCs).
 - b. Carbon dioxide (CO₂).
 - c. Sulfur Hexafluoride (SF₆)
 - d. Methane (CH₄)
6. Between two alternative policies - emission standard and technology standard, which offers more flexibility to sources of pollution to control pollution at a lower cost?
 - a) Emission standard
 - b) Technology standard
 - c) Both of the above
 - d) None of the above

7. Continued depletion of the ozone layer will most likely result in
 - a) an increase in skin cancer among humans
 - b) a decrease in atmospheric pollutants
 - c) An increase in marine ecosystem stability
 - d) A decrease in climatic changes
8. Which of the following conditions does Environmental taxes not satisfy?
 - a) Static cost efficiency
 - b) Dynamic cost efficiency
 - c) Goal fulfilment
 - d) Polluter pays principle
9. Kyoto Protocol the trading scheme permitted between Annex1 and non-Annex 1 countries is called
 - a) Joint Implementation
 - b) Emission trade scheme
 - c) Marketable permit
 - d) Clean Development Mechanism
10. Which of the following schemes have been applied in Indonesia that led to increased compliance by firms
 - a) Green securities policy
 - b) PROPER
 - c) Targeting
 - d) Green Rating
11. What is it called when government uses laws and regulations to dictate the standards and/or technology to reduce pollution?
 - a) Pigouvian Taxes.
 - b) Command-and-control regulations (CAC)
 - c) Subsidy.
 - d) Lawsuits.
12. If government regulates the amount of pollutant present in the surrounding (ambient) environment, which type of Command-and control regulations does the government use?
 - a) Ambient Standards.
 - b) Emission standards.
 - c) Technology standards.
 - d) Grandfathering of regulations
13. The Framework Convention on Climate Change took place in
 - a) the 1973 – 1979 Tokyo Round.
 - b) the 1987 – 1993 Uruguay Round.
 - c) the 1997 Kyoto Protocol.
 - d) the 2001 Doha Round.
14. Which good below is a public good?
 - a) Military and police.
 - b) Used car market.
 - c) Insurance from a private company.
 - d) Petroleum imported from a government-controlled oil field.

15. Which among the following has longer atmospheric lifetime?
- a) Methane
 - b) CFC-12
 - c) Perfluoro methane
 - d) Nitrous oxide

16. Which one of the following is not a source of market failure?
- a) Public goods.
 - b) Product is both rival and excludable.
 - c) Presence of externalities.
 - d) Asymmetric information.

SECTION 2: SOCIOLOGY (Question 17 to 33)

17. **Assertion (A):** Economy is dependent on society and the environment **Reason (R):** The primacy to the economy is the political reality.

- a. Both (A) and (R) are true and (R) is the correct explanation of (A)
- b. Both (A) and (R) are true, but (R) is not the correct explanation of (A)
- c. (A) is true, but (R) is false
- d. (A) is false, but (R) is true

18. Haughton's principle of interspecies equity closely overlaps with ideas of ...
- a. Deep Greens
 - b. Status-quo
 - c. Political reality
 - d. Weak sustainability

19. Sustainable Development (SD)

- a. Attempts to link environmental issues with socio-economic issues;
- b. Is an anthropocentric concept
- c. Questions the claim that human well-being can be achieved through increased global trade and industry;
- d. All of the above

20. Recent land sinking/subsidence in Joshimath (Uttarakhand) can be seen as a result of...

- a. Technological miscalculation
- b. Application of utilitarian or instrumental logic to Nature
- c. Upholding the intrinsic value of Nature
- d. None of the above

21. The first goal of UN SDGs is 'No Poverty', which is an indication of

- a. Lack of inter-generational equity
- b. Lack of interspecies-equity
- c. Lack of intra-generational equity
- d. Climate justice

22. The movement against Karnataka Pulpwoods Limited (KPL), according to Guha, was driven by...
- a. Ecological refugees
 - b. Omnivores
 - c. Ecosystem people
 - d. Middle class
23. 'Full stomach' environmentalism in the global North ...
- a. Calls for a transformation
 - b. Calls for a change in systems of production
 - c. Calls for a change in systems of distribution
 - d. Calls for a change in attitudes towards the natural world
24. **Assertion (A):** The environmentalism of the poor can be interpreted as resistance to resource capture **Reason (R):** It has no ecological content
- a. Both (A) and (R) are true and (R) is the correct explanation of (A)
 - b. Both (A) and (R) are false, and (R) is not the correct explanation of (A)
 - c. (A) is true, but (R) is false
 - d. (A) is false, but (R) is true
25. The *pradarshan*, *hartal*, *rasta roko*, *dharna* conducted by ecosystem people are...
- a. Illegal ways of protests
 - b. Technique used by lazy people
 - c. Actions against governments
 - d. Strategies of direct action
26. **Assertion (A):** It is the poor who are affected the most by environmental destruction. **Reason (R):** Poverty and need makes them polluters
- a. Both (A) and (R) are true and (R) is the correct explanation of (A)
 - b. Both (A) and (R) are true, but (R) is not the correct explanation of (A)
 - c. (A) is true, but (R) is false
 - d. (A) is false, but (R) is true
27. **Assertion (A):** Forests are integral to tribal peoples way of life. **Reason (R):** Their material culture is rooted on forests and forest produce
- a. Both (A) and (R) are true and (R) is the correct explanation of (A)
 - b. Both (A) and (R) are true, but (R) is not the correct explanation of (A)
 - c. (A) is true, but (R) is false
 - d. (A) is false, but (R) is true
28. Concept of Sacred Grove helps to maintain and conserve the natural environment because...
- a. Forest conservation act (1980) mandate
 - b. sal wood has no commercial value
 - c. tribals practice jhoom cultivation
 - d. tribals consider it as a dwelling place of deities

29. **Assertion (A):** Cultural practices like Totemism enforce obligation towards the environment **Reason (R):** Tribes observe certain taboos with respect to their totems..
- a. Both (A) and (R) are true and (R) is the correct explanation of (A)
 - b. Both (A) and (R) are false, and (R) is not the correct explanation of (A)
 - c. (A) is true, but (R) is false
 - d. (A) is false, but (R) is true
30. The attitudes of tribes towards the nature can be described as
- a. Rational domination
 - b. Resource extractivism
 - c. Rational adaptation
 - d. Destructive development
31. Land constitute the bedrock of tribal identity because
- a. It's a valued commodity
 - b. symbiotic connection between their land, territoriality and nature
 - c. they have land *pattas* or registration from the government
 - ✗ d. All of the above
32. Our society's throwaway culture is an indicator of ...
- a. High growth and GDP
 - b. Conservation through recycling
 - c. Absence of instrumental value
 - d. organised irresponsibility
33. Concept of Modernity is characterised by ...
- a. Mass industrialisation
 - b. Urbanisation
 - c. Increased use of technology
 - d. All of the above

SECTION 3: PHILOSOPHY (Question 34 to 50)

34. According to Eugene Hargrove, which of the following ideas fits all the later descriptions of matter and had the greatest influence on western environmental thinking?
- a. Thalesian notion of the arche as water
 - b. Pythagorean notion of the arche as number
 - c. Democritean notion of the arche as atom
 - d. Parmenidean notion of the arche as the One
35. Plato did not develop an aesthetic perspective of nature, according to Hargrove, because he considered:
- a. Greek artists/poets/painters as imperfect.
 - b. literary skills as deceptive and himself never employed them in his dialogues.
 - c. artists as incapable of appreciating the ideal beauty of nature.
 - d. art as imitation/mimesis of natural objects that are imperfect shadows of forms.

36. "[T]alk about values is just the expression of emotion and has no objective significance." This critical statement of Hargrove refers to which of the entrenched beliefs of modern culture that has grave repercussions on the scientist's attitude towards nature?
- One or many debate
 - Reason or emotion debate
 - Value and emotion association
 - Fact and Value dichotomy
37. According to Hargrove, for which of the following group of sciences the Cartesian method of reducing complex ideas into simple parts through the use of reason does not fit?
- Geology, Chemistry, Ecology
 - Geology, Physics, Biology
 - Chemistry, Geology, Ecology
 - d. Geology, Biology, Ecology
38. Buddhist environmental view celebrates:
- a. The interconnectedness of many-ness
 - The holistic view of one-ness
 - Egocentric view of humanity
 - d. Anthropocentrism
39. The doctrine *Pratityasamutpada* (dependent origination) implies:
- a. Mutual web of relationship and connectedness
 - One-ness and independence
 - Unreality of the world
 - d. Reality of Consciousness (Atman)
40. *Panchashila* principles spring from an understanding of our fundamental recognition of:
- a. Relationship with others and the nature
 - Relationship with God and nature
 - Relationship with the Buddha as Divine
 - d. Relationship with Buddhist Sangha
41. The Earth is regarded as _____ by the Sāṃkhya philosophy.
- sustainable
 - b. sentient
 - insentient
 - d. conscious
42. According to Nyāya-vaiśeṣika, *dravya* or substance cannot be the locus of:
- quality or *guṇa*
 - non-substance
 - c. action or *karma*
 - d. anything
43. According to the Sāṃkhya philosophy 'insentience' is the characteristic of:
- Guṇa
 - b. Dravya
 - Prakṛti
 - d. Puruṣa

44. Non-dual Vedānta philosophy postulates the empirical reality to be:
- a. real
 - b. illusory appearance
 - c. real appearance
 - d. real manifestation of the God
45. In the *Critique of Pure Reason*, nature for Kant is
- a. completely independent of experience.
 - b. a correlate of experience.
 - c. entirely unknowable.
 - d. to be known only through mystical experience.
46. In the Critique of Judgement, to experience nature as dynamically sublime is to experience it as
- a. fear inducing power.
 - b. divine beauty.
 - c. unconditional love.
 - d. infinite value
47. One of the implications of Heidegger's essay *The Question Concerning Technology* is the following:
- a. The only solution to climate change, which is caused by modern technology is modern technology
 - b. Climate change is not something real but a mere social construct.
 - c. Climate change can only be countered when modern technology reaches its final state of development.
 - d. The response to climate change, which is caused by modern technology cannot be provided by modern technology alone
48. According to Warren, ecofeminism constitutes a philosophical position because it:
- a. uses sex/gender as an analytical framework
 - b. uses insights about non-human nature for building theory
 - c. uses conceptual analysis and argumentative justification
 - d. uses insights from policy-making and political activism on environmental issues
49. Ecofeminist philosophers argue that patriarchy exhibits:
- a. Oppositional Value Dualism
 - b. Reciprocal Value Dualism
 - c. Value Linearity
 - d. Value Equality
50. Ecofeminists argue that the domination of women and non-human Others is:
- a. Inevitable but not justified
 - b. Inevitable and justified
 - c. Not inevitable but justified
 - d. Neither inevitable nor justified
